

PPLD Young Adult Services Tutorial: Magnetic Bookmarks

Description:

In this tutorial, you will learn how to make a simple magnetic bookmark!

Supplies:

1. Magnets (adhesive or not)
2. Scissors
3. Super Glue *You will not need super glue if you buy adhesive magnet sheets.
4. Cardstock with or without preprinted designs (p. 2-6)
5. Mod Podge (optional)
6. Paint brush for mod podge use (optional)

Instructions:

1. Cut out a bookmark template (either pre-made or blank from cardstock) or make your own at home.
2. Fold the bookmark template in half.
3. If you use super glue to attach the magnets to the inside folds, let dry for 15 minutes, if not just place your adhesive magnet in place.
*Make sure you have the magnet aligned properly before gluing or sticking the magnet or else the magnet will not work properly.
4. If you used the cardstock template, either draw designs or mod podge papers onto the bookmark. Let dry.
5. You have a magnetic bookmark!
